

# Navigating Your Laundry Room

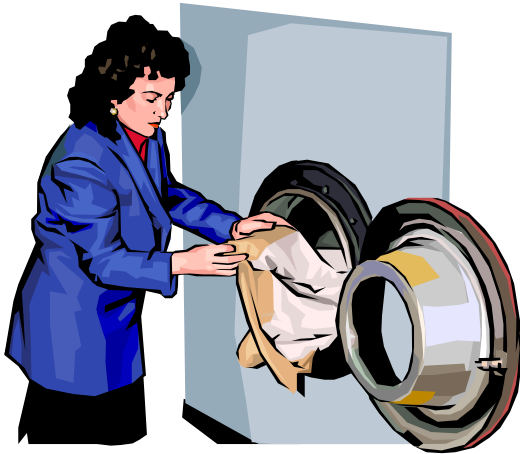

Quick Tips (QT) to help you extend the life of your linen!

- ❖ Separate your sheets from your pillow cases
- ❖ NEVER wash your bed linen with your terry bath linen.
- ❖ Always use the right formula. Taking shortcuts costs more money in chemicals, time, and will give you poor results for your guests!
- ❖ Never “free-pour” chemicals into your machine.  
This will cause damage very quickly to your linen
- ❖ Always allow your linen at least one day to rest before you let it go back to the guest rooms
- ❖ DON'T OVERDRY your linen!!!!

Quick Tips (QT) to help you extend the life of your linen!

***Did you know*** that terry linen absorbs about three times the amount of water of fabrics like sheets? This is why it takes so much longer to dry bathroom terry. IF you dry them together, the sheets and pillow cases will be over dried, and be very rough.

***Did you know*** that too much softener on your towels will make them feel rough? And, if you have too much softener, your towels will not absorb water when your guests use them to dry off!

Quick Tips (QT) to help you extend the life of your linen!

**Did you know** that removing your laundry quickly from both the washer and dryer can reduce the amount of wrinkles, and greatly improve the way the linen looks on the beds!

**Did you know** that if you are pouring chemicals into the washer, you may be damaging the linen and costing your hotel a lot of money for replacement...PLEASE DON'T BE A CHEMIST!!!!
